ACKNOWLEDGEMENT AND RECORD OF SPCC INSPECTION AND PLAN REVIEW OFFSHORE OIL DRILLING PRODUCTION OR WORKOVER FACILITIES

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY - REGION 6

1445 Ross Avenue, 6 SF-PO, Dallas, Texas 75202-2733

SPCC Case #: FY-INSP- / COO S (c) FRP ID: FRP 06: CA COS 38 SPCC Inspection Date: 2/1/10 Time: 09 CO FRP Inspection Date: Time:
Name of Facility: West Buy Production Facility Latitude: 29°09'17.6 Longitude: 87°20'37.4 Source: Plan Facility: Address (1) 509'65'350
Facility Address/Location.
City: County/Parish: flaguenines State: State:
Facility Contact: Henri de Launay Title: Env. Coordinator
Telephone Number: 213-289-267/ Email: hdelaunay@hilcorp.com
Name of Owner/ Operator: Hi Corp Energy Company
Address: 1201 Louisiana St Juite 1400
City: Has for State: 47002
Contact: Henri de Launay Title: Sur. Coordingtor
Telephone Number: Same Email: Same
Synopsis of Business: Offshore production +acility
How many employees work at this facility? NAICS #: 211111
If unmanned, how many employees maintain this facility?
Is the Facility: Unattended Attended Daily (8 hr) Daily (24 hr) Periodically)
Route of Entry to Waterway: Local Cod In Tom cor 1055.
Distance to waterway (in feet):
Relative direction to water body: Elevation above water body (ft):

The aggregate aboveground storage	capacity is 10,000 Gal	lons or	r less 112.3(g))(1) <u>AN</u>	<u> </u>		☐ YES ☐ NO
The facility has had no single discharge exceeding 1,000 U. S. gallons, and the facility has had no two discharges exceeding 42 U.S. gallons within any twelve-month period in the tree years prior to the SPCC Plan self-certification date, or since becoming subject to the rule if the facility has been in operation for less than three years. (Note: Oil discharges that result from natural disasters, acts of war, or terrorism are not included in this qualification determination.) 112.3(g)(2)							
Is the facility considered a Qualified Fac certified the SPCC Plan, then check YES			above, <u>AND</u> t	he own	er/operator has se	lf	YES NO

GENERAL APPLICABILITY 40 CFR 112.1	
Does the facility maintain an aggregate aboveground oil storage capacity of over 1,320 gallons, and/or completely drive	ed oil
storage capacity of over 42,000 gallons?	□NO
and	,
Is the facility engaged in drilling, producing, gathering, storing, processing, refining, transferring, distributing, using, or	
consuming oil and oil products, which due to its location could reasonably be expected to discharge oil into or upon the	
If YES to both, the facility is regulated under 40 CFR 112.	
Note: The following storage capacity is not considered in determining applicability of SPCC requirements:	
- Completely buried tanks subject to all the technical requirements of 40 CFR 280 or a state program approved under 40 CFR 281.	,
- Equipment subject to the authority of the U.S. Department of Transportation, U.S. Department of the Interior, or Minerals Management	ent
Service, as defined in Memoranda of Understanding dated November 24, 1971, and November 8, 1993.	
- Any facility or part thereof used exclusively for wastewater treatment and not used to satisfy SPCC requirements.	
- Containers smaller than 55 gallons.	
- Permanently closed containers.	
•	

FACILITY RESPONSE PLAN (FRP) APPLICABILITY	
Does the facility transfer oil over water to or from vessels and has a total oil storage capacity greater than or equal to 42,000 gallons?	YES NO
Or, Does the facility have a total oil storage capacity of at least 1 million gallons, And, at least one of the following is true:	□ YES (NO
The facility does not have secondary containment sufficiently large enough to contain the capacity of the largest aboveground tank plus sufficient freeboard for precipitation.	YES NO
The facility is located at a distance such that a discharge could cause injury to fish and wildlife and sensitive environments.	YES NO
The facility is located such that a discharge would shut down a public drinking water intake.	YES NO
The facility has had a reportable discharge greater than or equal to 10,000 gallons in the past 5 years.	YES NO
If YES to any of the above, the facility is a non-transportation related onshore facility required to prepare and implement a FRP as outlined in 40 CFR 112.20.	
Does the facility maintain a FRP? ☐ YES ☐ NO ☐ Not Required FRP Number: FRP-06-	
Does the Plan include a signed copy of the Certification of the Applicability of the Substantial Harm Criteria per 40 CFR Part 112.20(e)? Attachment C-II	YES NO
to affect fish and wildlife.	eol

REQUIREMENTS FOR PREPA	RATION AND IMPLEME	NTATION OF	A SPCC Plan – 40 CFR 112.3			
Facility Startup Date:	Date of initial SPCC Plan	preparation:	Current Plan version (date/number):			
For facilities (excluding farms) in operation prior to August 16, 2002, was the Plan amended and implemented by November 10, 2010? 112.3(a) YES NO NA						
For facilities (excluding farms) beginning operation between August 17, 2002 and November 10, 2010, is the Plan prepared and fully implemented by November 10, 2010? 112.3(a) YES NO N/A						
For facilities beginning operation after November 10, 2010, was the Plan implemented before beginning operations? 112.3(b) & (c) YES NO N/A						
Is an SPCC Plan prepared? YE	ES NO N/A

GENERAL REQUIREMENTS FOR SPCC PLANS 112.7(a-d)	Adequately Addressed in Plan				
Does the SPCC Plan indicate (by signature and date) that management has approved the plan? 112.7					
Mgmt Personnel Name: Henri de Launay	YES NO NA				
Mgmt Personnel Title: Env Coordinator					
Does the Plan format follow the sequence in the rule? 112.7 or	OYES NO D N/A				
If no, is a cross-reference provided?	DIYES DATO DINA				
Does the Plan call for additional facilities or procedures, methods for equipment	☐ŸES ☐ NO 図 N/A				
not yet fully operational?					
If yes, are the following items discussed in the Plan?	☐ YES ☐ NO ☑ N/A				
☐ Installation ☐ Start-up					
Does the Plan include a discussion of conformance with SPCC requirements?	YES NO NA				
112.7(a)(1)					
	Dyro Duo My				
Does the Plan deviate from SRCC requirements? 172-7(a)(2)	YES NO NA				
If yes, does the plan provide;]				
Written documentation validating/explaining rational for non-conformance with the SPCC requirements? and	☐ YES ☐ NO 図 N/A				
Written documentation outlining/detailing the alternative method/how it	☐YES ☐ NO 図 N/A				
achieves environmental equivalence?					

Does the Plan contain a facility diagram? 1127(a)(3)	☐ YES ☐ NO ☒ N/A	☐ YES ☐ NO ☑ N/A
Does the diagram include:		
The location and contents of each containers, and	☐ YES ☐ NO 図 N/A	☐YES ☐ NO ☑ N/A
-{Completely,buried storage tanks?; and	☐ YES ☐ NO ☑ N/A	□YES □NO ØN/A
Transfer stations? Fand	☐ YES ☐ NO ☒ N/A	□YES □NO ☑N/A
Connecting pipes?	☐ YES ☐ NO ☒ N/A	□YES □NO 図N/A
Is there a description in the Plan of the physical layout of the facility and includes: 112.7(a)(3)	YES NO . NA	
- The type of oil in each container and its storage capacity? 112.7(a)(3)(i)	YES NO NA	YES NO NA
 Discharge prevention measures including procedures for routine handling of products? 112.7(a)(3)(ii) 	YES NO N/A	TYES NO N/A
 Discharge or drainage controls, such as secondary containment around containers, and other structures, equipment, and procedures for the control of a discharge? 112.7(a)(3)(iii) 	DYES NO N/A	YES NO NA
 Countermeasures for discharge discovery, response, and cleanup (including facility and contractor resources)? 1712-7(a)(3)(iv 	☐ YES ☐ NO ☑ N/A	□YES □NO ⊠N/A
Methods for disposal of recovered materials in accordance with applicable legal requirements 2: 1/12:7(a)(3)(v)	□YES □NO ☑N/A	
Contact list and phone numbers for the facility response coordinator. NRC: cleanup contractors and federal, state, and local agencies who must be notified in the case of a discharge as described in §112.1(b)? 112.7(a)(3)(w)	□ YES □ NO ☒ N/A	
Does the Plan include information and procedures for reporting a discharge (exact location, phone number, date/time of material discharged, quantity, actions taken, evacuations, notifications,(names/organizations etc.)? 112.7(a)(4)	□ YES □ NO □ N/A	
Does the Plan include procedures to use when a discharge may occur? 112.7(a)(5)	YES NO NA	
Does the Plan include a prediction and description of major equipment failure(s) that could result in a discharge from the facility per 40 CFR 112.7(b)?	YES NO NA	·
direction, rate of flow, and total quantity of oil		
Does the Plan discuss appropriate containment and/or diversionary structures/equipment (dikes, berms, retaining walls, curbing, culverts, gutters/drain systems, weirs, boom, diversion/retention ponds, sorbent material) and is sufficiently impervious to contain oil. per 40 CFR 112.7(c)	COLVES [] NO [] N/A	ZYES □ NO □ N/A
Has it been determined in the Plan, that the installation of structures or equipment (containment) is not practicable ? 112.7(d) If YES, check ☐ then 40 CFR Part 109 Checklist must be filled out and,	YES NO ZÍNA	
- Is the impracticability clearly demonstrated?	YES NO MINA	
 For bulk storage containers, is periodic integrity testing of containers and leak testing of the valves and piping associated with the container conducted? 	YES NO NA	YES NO DA
Is a strong contingency plan per 40 CFR 109 provided? 112.7(d)(1)	YES NO Z N/A	
 Is a written commitment of manpower, equipment, and material (to control and remove any quantity of oil discharged) provided in the SPCC plan? 112.7(d)(2 	☐ YES ☐ NO ☑ N/A	

or procedures to use during a discharge. The plan does not follow their rule non does It have a cross reference.						
			,			
INSPECTIONS, TESTS, AND RECORDS 112-7(e)	Adequately Addressed in Plan	Adequately Addressed in Field				
Are inspections and tests required by 40 CFR 112 conducted in accordance with written procedures developed for the facility? 112.7(e)	☐ YES ☑ NO ☐ N/A	ØYES □ NO □ N/A				
If Yes, are written procedures, records of inspections and/or customary business records:						
- Signed by the appropriate supervisor or inspector?	TYES TO NO NA	YES NO NA				
- Kept with the SPCC Plan?	YES NO NA	ZYES NO NA	1:			
- Maintained for a period of three (3) years?	YES NO NA	YES NO NA				
inspections and paperwork is only I kept is there are problems.

Qualified Facilities Checklist

Appendix A: Qualified Facility Plan Requirements

Complete this Appendix only if the facility is a "qualified facility" as defined in §112.3(g). A qualified facility's Plan, whether certified by a PE or self-certified, must comply with all of the applicable requirements of §112.7 and subparts B and C of 40 CFR Part 112 referenced earlier in this checklist.

SF	PCC Inspection #:	FY-INSI	P	
112.6≟Qualified Facility Plan Requirements		Yes	No.	N/A
(a) Did the owner/operator of the qualified facility self-certify the SPCC Plan?				
If NO, see requirements for 112.3(d) above. If YES, did the owner/operator certify in the Pl	lan that:			
(1) He or she is familiar with the requirements of 40 CFR part 112.				
(2) He or she has visited and examined the facility.				
(3) The Plan has been prepared in accordance with accepted and sound industry practic standards.	ces and			
(4) Procedures for required inspections and testing have been established.				
(5) The Plan is being fully implemented.	· .			
(6) The facility meets the qualification criteria set forth under §112.3 (g).				
(7) The Plan does not deviate from any requirements as allowed by §112.7(a)(2) and 11 as described under §112.6(c).	12.7(d), except			
(8) Management has given full approval of the Plan and necessary resources have been for the Plan's full implementation.	n committed			
(b) Did the owner/operator self-certify any of the Plan's technical amendments?				
If YES: Is the certification of any technical amendments in accordance with the provisions a (§112.6(a))?	above			
(c)(1) and (d)(1) Environmental Equivalence. For each alternative measure allowed under the Plan is accompanied by a written statement by a PE that states the reason for nonconful describes the alternative method and how it provides equivalent environmental protection in with §112.7(a)(2).	ormance and	·		
(c)(2) and (d)(1) Impracticability. For each determination of impracticability of secondary co pursuant to §112.7(d), the Plan clearly explains why secondary containment measures are practicable at this facility and provides the alternative measures required in §112.7(d) in lieu containment.	not			
 (c)(3) Security. The Plan contains one of the following: (i) The Plan complies with requirements under §112.7(g), OR (ii) The Plan complies with the requirements under §112.6(c)(3)(ii): Plan describes how owner/operator secures and controls access to the oil handling, processing and storage secures master flow and drain valves; prevents unauthorized access to starter controls pumps; secures out-of-service and loading/unloading connections of oil pipelines; add appropriateness of security lighting to both prevent acts of vandalism and assist in the oil discharges. 	ge areas; s on oil Iresses the			
 (c)(4) Bulk Storage Containers. The Plan contains one of the following: The Plan complies with the requirements under §§112.8(c)(6) or 112.12(c)(6), as all (ii) The Plan complies with the requirements under §112.6(c)(4)(ii): Aboveground containers, supports and foundations tested for integrity on a regular and whenever repairs are made. Appropriate qualifications for personnel performing tests and inspections have be in accordance with industry standards. The frequency and type of testing and inspections have been determined in according industry standards, taking into account container size, configuration and design. Container supports and foundations regularly inspected Outside of containers frequently inspected for signs of deterioration, discharges, or container size. 	er schedule en determined rdance with			

Records of inspections and tests maintained			
(d) Did a PE certify a portion of a qualified facility's self-certified Plan? If YES, the PE must certify in the Plan that:			
 (d)(2) (i) He/she is familiar with the requirements of 40 CFR Part 112. (ii) He/she or a representative agent has visited and examined the facility. (iii) The alternative method of environmental equivalence in accordance with §112.7(a)(2) or the determination of impracticability and alternative measures in accordance with §112.7(d) is consistent with good engineering practice, including consideration of applicable industry standards, and with the requirements of 40 CFR Part 112. 			
(b)(1) If a PE certified a portion of the Plan, did a PE certify any technical amendments that affect this portion of the Plan?

SPCC CONTINGENCY PLAN REVIEW CHECKLIST

NA

Appendix C: 40 CFR Part 109–Criteria for State, Local and Regional Oil Removal Contingency Plans

If a facility makes an impracticability determination for secondary containment in accordance with §112.7(d), it is required to provide an oil spill contingency plan following 40 CFR, part 109. Items below must be addressed in the Plan and implemented at the facility.

SPCC Inspection #: FY-INSP-

109.5-Development and implementation criteria for State, local and regional oil removal contingency.	Yes	No .
(a) Definition of the authorities, responsibilities and duties of all persons, organizations or agencies which are to be involved in planning or directing oil removal operations.		
(b) Establishment of notification procedures for the purpose of early detection and timely notification of an oil discharge including:		
(1) The identification of critical water use areas to facilitate the reporting of and response to oil discharges.		
(2) A current list of names, telephone numbers and addresses of the responsible persons (with alternates) and organizations to be notified when an oil discharge is discovered.		
(3) Provisions for access to a reliable communications system for timely notification of an oil discharge, and the capability of interconnection with the communications systems established under related oil removal contingency plans, particularly State and National plans (e.g., NCP).		
(4) An established, prearranged procedure for requesting assistance during a major disaster or when the situation exceeds the response capability of the State, local or regional authority.		
(c) Provisions to assure that full resource capability is known and can be committed during an oil discharge situation including:		
(1) The identification and inventory of applicable equipment, materials and supplies which are available locally and regionally.		
(2) An estimate of the equipment, materials and supplies which would be required to remove the maximum oil discharge to be anticipated.		
(3) Development of agreements and arrangements in advance of an oil discharge for the acquisition of equipment, materials and supplies to be used in responding to such a discharge.		·□
(d) Provisions for well defined and specific actions to be taken after discovery and notification of an oil discharge including:		
(1) Specification of an oil discharge response operating team consisting of trained, prepared and available operating personnel.		
(2) Pre-designation of a properly qualified oil discharge response coordinator who is charged with the responsibility and delegated commensurate authority for directing and coordinating response operations and who knows how to request assistance from Federal authorities operating under existing national and regional contingency plans.		
(3) A preplanned location for an oil discharge response operations center and a reliable communications system for directing the coordinated overall response operations.	Ò	
(4) Provisions for varying degrees of response effort depending on the severity of the oil discharge.		
(5) Specification of the order of priority in which the various water uses are to be protected where more than one water use may be adversely affected as a result of an oil discharge and where response operations may not be adequate to protect all uses.		
(e) Specific and well defined procedures to facilitate recovery of damages and enforcement measures as provided for by State and local statutes and ordinances.		

Environmental Equivalence (EE) Checklist

Appendix D: Environmental Equivalence Requirements

Complete this Appendix only if the facility has declared "environmental equivalence" measures as described in § 112.7(a)(2). Facility owners and operators have the flexibility to deviate from specific rule provisions if the Plan states the reason for nonconformance and if equivalent environmental protection is provided by some other means of SPCC. EE declarations must be certified by a PE. For EE declarations, see portions of checklist referenced earlier.

Telefeneed carrier.			
SPCC Citation: SPCC Inspection #: FY-INSP-			
Is there written documentation validating/explaining rational for non-conformance with the SPCC requirements?			
Is there written documentation outlining/detailing how the alternative method achieves environmental equivalence? and,			
·	<u> </u>		
Is the alternative method:			
Technically feasible?		YES NO	
Logistically sound?		YES NO	
Practicable?		YES NO	
Name of Professional Engineer:			
License Number: State:			
Other PE certification requirements:			
Did a PE certify a portion of a qualified facility's self-certified Plan?	YES NO		
Description of environmental equivalence:			
		•	
Inspector Comment:	٠.		
		• • •	

^{*} Use additional Appendix D forms for multiple Environmental Equivalent declarations.
